**WAUKESHA CHERRY-BURRELL
CENTRIFUGAL PUMPS DESIGNED
FOR MANY APPLICATIONS**

FOR IMMEDIATE RELEASE

DELAVAN, WI (2003) -- Waukesha Cherry-Burrell's 200 Series Sanitary Centrifugal Pumps are often used in the production of flavorings, sweeteners, alcohols and wines, beer, and soft drinks. The 200 Series sanitary pumps are designed for Cleaning in Place (CIP) and meet the tough requirements of the U.S.D.A. and 3A.

The pumps utilize commercially available seal choices, including cartridge type. One size seal fits all models. Precision construction, including investment cast wetted parts, eliminates problems caused by vibration, short bearing life, high NPSH requirements, high seal maintenance costs or adverse operating conditions.

Also available in the 200 Series is a High-Pressure Centrifugal Pump, specifically designed for recirculating service in reverse osmosis and other membrane systems, and an Aseptic Centrifugal Pump, modified to prevent contaminated air or liquid from entering the product zone.

For more information, contact the company at (800) 252-5200 or visit their web site at www.gowcb.com.
